

Roar - Lion make

Instructions:

1. Print out your Roar Lion. Cut out the lion's face around the dotted lines on the first page. Be careful when using scissors and ask an adult for help.
2. Cut out the handles in the lion's mouth. Do not cut any of the hard lines as this is where you will fold the paper. Now there should be an open square section in the lion's face where you will stick the mouth.

3. Fold the second page in half along the hard line down the page. Stick the two sides together with glue then and cut around the dotted lines to get rid of any white around the outside.

4. Fold the hard line at the top of the mouth inwards over the colored part then fold the next hard line upwards so you can see the teeth just above the ROAR logo. Fold the next hard line up so the teeth pop up in a tent-like shape. Do the same for the bottom so the teeth stick up on the top and bottom.

5. Stick the teeth to the back of the paper you have just folded to make it secure. Cut out the teeth around the dotted lines as carefully and close as you can.

6. Fold the mouth in half through the hard line running through the middle of the mouth.

7. Stick the handles to the back of your lion mouth. Make sure you leave enough room to put your fingers through. You now have a lion's mouth which opens and closes.

8. Stick the top of the lion's mouth where it says "glue here" to the back of the lions head. Now put your fingers in the handles and you have your Roar Lion make!
